

Intern as Software Engineer OCI

As a world leader in cloud solutions, Oracle uses tomorrow's technology to tackle today's challenges. We've partnered with industry-leaders in almost every sector—and continue to thrive after 40+ years of change by operating with integrity.

We know that true innovation starts when everyone is empowered to contribute. That's why we're committed to growing an inclusive workforce that promotes opportunities for all.

As an **intern Software Engineer** in Oracle Cloud Infrastructure, you will **gain valuable experience** and **kick-start your software career** by being part of development, delivery and operation of cloud services that will enable animation, film, and game development studios to migrate their entire production pipeline to the cloud.

What you will do

You will be part of a scrum team delivering features every 2 weeks. You will receive mentoring and guidance on how to become a good software developer. You will develop microservice architecture and you will build everything on top of Oracle cloud. It is a greenfield opportunity in the media and entertainment industry. We use IntelliJ Ultimate and Java17+, Micronaut, Maven, Kubernetes and Oracle DB.

Ideal Qualifications:

- A strong desire to learn about software development and cloud technologies.
- Understanding OOP
- Strong communication, collaboration, and problem-solving skills.
- Self-motivated with a desire to learn and grow in the field of software engineering.
