

Contents

Contents	3
1 Introduction	5
2 Preliminaries and Definitions	8
2.1 Basic Definitions	8
2.2 Grammars	11
3 Context Conditions Placed on Derivation Domains	16
3.1 Sequential Grammars over Word Monoids	16
3.2 Parallel Grammars over Word Monoids	24
4 Conditions Placed on the Use of Productions	31
4.1 Sequential Conditional Grammars	31
4.1.1 Context-Conditional Grammars	31
4.1.2 Random-Context Grammars	38
4.1.3 Generalized Forbidding Grammars	42
4.1.4 Semi-Conditional Grammars	54
4.1.5 Simple Semi-Conditional Grammars	57
4.2 Parallel Conditional Grammars	84
4.2.1 Context-Conditional ET0L Grammars	84
4.2.2 Forbidding ET0L Grammars	90
4.2.3 Simple Semi-Conditional ET0L Grammars	109
4.3 Global Context Conditional Grammars	121
5 Conditions Placed on the Neighborhood of Rewritten Symbols	127
5.1 Continuous Context	127
5.1.1 Sequential Uniform Rewriting	128
5.1.2 Parallel Uniform Rewriting	135
5.2 Scattered Context	138
5.2.1 Scattered Context Grammars and Their Reduction	139
5.2.2 Semi-Parallel Uniform Rewriting	150
6 Grammatical Transformations and Derivation Simulations	157
6.1 Derivation Simulation	157
6.2 Grammatical Simulation	163

6.3	Simulation of E(0,1)L Grammars	164
7	Applications and Implementation	171
7.1	Applications	171
7.2	Implementation	175
8	Concluding and Bibliographical Notes	184
	Bibliography	186
	Index to Language Families	197
	Subject Index	199
